

Shapes and Colours

VARISOL offers a wide range of up-to-date and highquality awning fabrics.

Select from 100 fabric designs and find the appropriate design for the house and garden furniture. Whichever design you may select, all provide weathering resistance, and are sunfast.

A special impregnation provides additional protection. For an extra charge you can purchase a matching removable fabric valance.

The awning frames are available in white (RAL 9016), dark brown (RAL 8022) or silver (RAL 9006) with plastic coating as a standard.

Accessories

More convenience of operation by an integrated electric motor.

Special security by the reliable sun and wind detector with automatic control.

Design

The VARISOL quality approach: technical know-how - always state of the art and the use of high-quality material, making the purchase of an awning a profitable long-term investment.

The VARISOL K 150 uniquely combines advanced design with perfect technology. The slim-line awning cassette consists of a double-walled aluminium profile with side caps of impact-resistant plastic.

In its retracted position the awning is closed by the rounded front rail and thus optimally protects the awning fabric and the mechanical system from water and dirt. Plastic glides on the front rail allow the awning to be closed at low noise.

The stable awning cassette provides a maximum awning width of 5.00 m in connection with a 78 cm thick roller tube.

Fixed arm bearing of extruded aluminium profile

articulation arm with reinforced chain, all parts of the joint drop forged for maximum strength

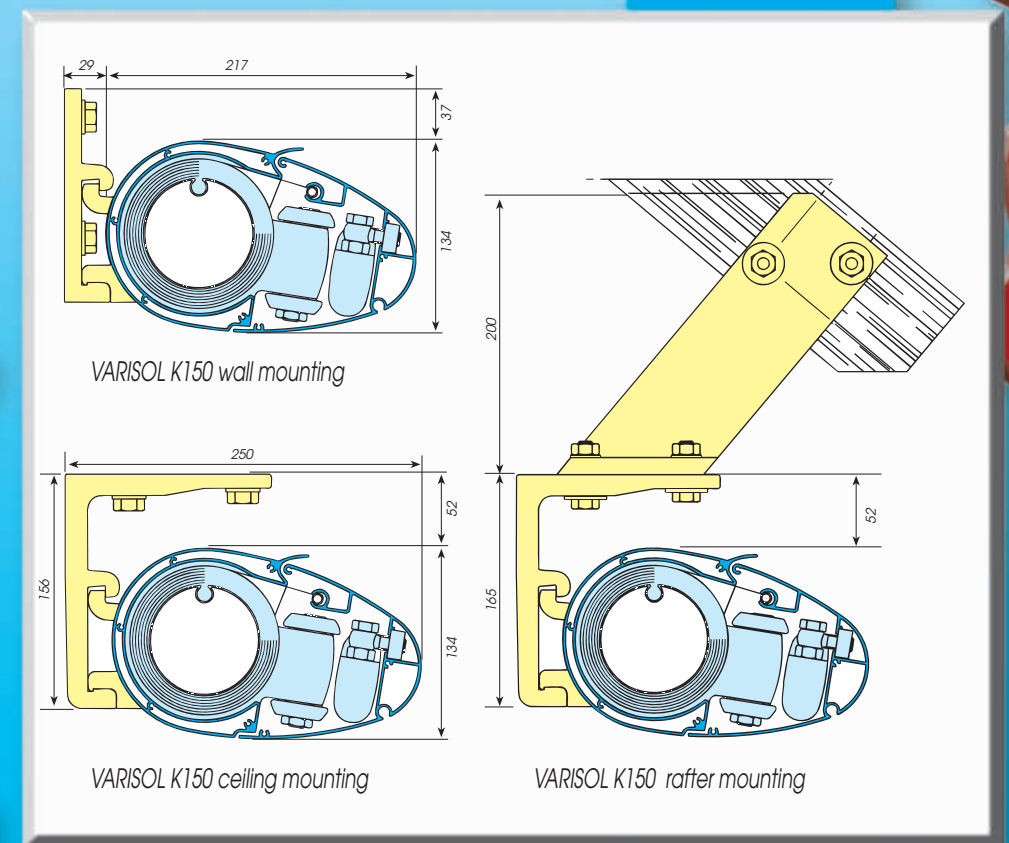

The awning is operated by a smooth-running and sturdy worm gear. As an accessory, a tube motor with electronic torque deactivation integrated into the fabric shaft provides more comfort, ensuring that the VARISOL K 150 can be closed optimally so that there is no gap between the awning cassette and the front rail to prevent rain water from entering.
